About Digital and Technology Solutions

A Digital and Technology Solutions Professional provides technology enabled solutions to internal and/or external customers, in a range of areas including software, business and systems analysis, cyber security, data analysis and network infrastructure. They implement technology solutions that enable businesses to develop new products and services and to increase an organisations productivity using digital technologies. They are confident, competent and capable independent Technology Solutions Professionals able to operate in a range of related roles. The occupation is based upon a core set of outcomes that will be supplemented by one, and only one, of six specialism areas detailed below that cover the roles identified by employers.

What will I study?

This is a dual award which will cover:

- Strategic management
- Project management
- Human resources management
- Global marketing
- Research business data
- International business
- Cross cultural management
- Managerial finance.

As an apprentice you will become an affiliate member of CMI and have access to member benefits.

Entry requirements

You will usually be expected to have A Levels or existing relevant qualifications, but other relevant or prior experience may also be considered. You should have qualifications in English, maths and IT at Level 2 or above.

Progression opportunities

After completing the degree you will be qualified to work in a managerial, professional or associate professional role.

Assessment

You will be assessed through:

- Regular on-programme assessment of knowledge, skills and behaviours, involving the employer and the University
- Development of a portfolio demonstrating learning and development activities, as well as their application in the workplace
- End-point assessment, reviewing their full achievements during the apprenticeship including:
 - review of portfolio of evidence
 - review of work based learning
 - presentation and interview
